

Maybelle Brow Pre-care

Pre Procedural Care for Eyebrows

Pre-Procedure DONTs

- Do not work out the day of the procedure and no heavy sweating for 5 days after. The salt in sweat will affect pigment retention.
- Do not tan 10 days pre/post treatment or come to your appointment with a sunburned face.
- Do not take aspirin, Niacin, Fish Oil, Vitamin E or Ibuprofen (or any blood thinners or thickeners) within 48 hours of procedure.
- No alcohol or caffeine the night before or on the day of your procedure.
- Avoid retinol, glycolic, salicylic acid, benzoyl peroxide for 30 days pre/post treatment.
- No chemical peels for 30 days pre/post treatment.
- Please note that the client will be more sensitive during their menstrual cycle.
- Botox must be done 1 month prior to service.
